

Joe Pres Gaudiano is a BS Biology graduate from Silliman University. He specializes in the taxonomy and protection of sharks and rays, marine mammals, and marine key biodiversity areas. Adon, as he prefers to be called, worked with multi-stakeholders from government agencies, NGOs, business entities, fishing communities, and academe to manage projects for the protection and conservation of sea turtles, sharks and rays, marine mammals, and large pelagic tunas. His previous work also involved strengthening the protection of one of the largest seascapes in the Philippines – the Tañon Strait in Visayas. Adon is currently the Project Manager of Plan International Philippines' SAFE Seas Project, which aims to empower fishing communities against human trafficking and labor exploitation on fishing vessels.
